Pictora — Smart Gallery & Media Organizer

Project Overview

Pictora is a Flutter application designed to help users browse, organize, review, and manage photos and videos with a clean interface and a safe deletion workflow.

Project Links

- **GitHub Repository:** https://github.com/anuskaavinashsingh2025-ship-it/pictoria.git
- **Download Android APK:** https://drive.google.com/file/d/1KPDJ4fzBbnF19EknipIYflYWeZEOpc02/view?usp=sharing
- **Demo Video:** https://drive.google.com/file/d/1ERKe8U-kfuIkffHHowwS_0USEnkYunq5/view?usp=sharing

How to Run

1. Download the Android APK using the link above.
2. Install it on a compatible Android device.
3. Grant the required photo and video permissions.
4. Open Pictora and explore its features.

Performance Strategy

Pictora uses thumbnail-based rendering, lazy loading, measured media sizes, and controlled video-player lifecycle management to help handle large media collections efficiently.

Testing

Automated tests and static analysis were run during development. Please refer to the GitHub repository README for the available testing instructions.
